WHEN our country was starting through a great crisis, the President of the United States looked to an alumnus of our school to aid him. General John J. Pershing met the challenge unflinchingly and with much dignity.

It is to him that we are proud
to dedicate this 1932 Echo.

A Message From Our President

Another year is almost gone
Trod its paths were by sprightly feet.
Youths' minds intent to work and play
And sing the songs of joy which ne'er grow old.
Recorded are the smiles and looks in this our book;
Its pages light the memories of days gone by,
And shall remind us of first faltering steps, and slow,
But with momentum gained, began to climb
Ascending with those who love children,
Taking them by the hand, saluting sunrise and the morning dew,
Protection from onrushing storm and clouds.
Children do we serve and love, who make this book.

—Eugene Fair.

Student Council

THE aim of the Student Council is to effect an organization of the student body for the purpose of creating a strong self-government and an effective cooperation with the faculty of this college. It is our belief that the student government has been highly successful in developing a greater student interest in activities, and thus, has brought forth stronger student leadership.

The Student Courts are part of this organization, representing the student body in the disposing of any problems which would regularly come under a department of justice in student life.

The Student Council has been one of the most outstanding extra-curricular activities, and, to the satisfaction of the administration, is gaining in strength and effectiveness each year.

JOHN LAFON BIGGERSTAFF, B. of Mus.
Graduate Student, New York Institute of Fine Arts
Professor of Music and Head of the Division of Arts

Division of Arts

"We can live without art—but not so well."

IT is a recognition of this fact that accounts for a group of departments in most institutions of higher learning today, whose function it is to develop individual skill in the various arts; the sound knowledge of fundamental principles that is essential to teaching them; and the understanding and enjoyment of them that does so much to enrich life. The Division of Arts in this College comprises three departments: Fine and Applied Arts, Industrial Arts, and Music.

FINE AND APPLIED ARTS

The paramount aim which underlies the entire college program in art today is that of developing rich appreciation, understanding, and knowledge of art and beauty, and the utilizing of this knowledge in meeting the problems of reality.

INDUSTRIAL ARTS

The Industrial Arts work is presented with a three-fold purpose. First, it proposes to give promising young men sufficient technical experience so that they can teach Industrial Arts work in the elementary and high schools of the land; second, it offers pre-engineering students an opportunity to do their basic work in mechanical drawing and some shop work before going to a professional school of engineering; third, it encourages the rank and file of students to learn the joy and personal satisfaction which comes to one when he successfully fashions materials to meet his needs. The three main purposes, then, are professional, pre-professional, and avocational.

The department is not operated under military discipline, rather, the students are expected to display considerable initiative and to proceed as much as possible "under their own steam."

MUSIC

The Music Department feels that it has an obligation to the individual in order that his abilities and appreciations may be developed; to the institution, in order that some contact with the beautiful, as expressed in music, may be afforded every student irrespective of his major field of study; and to the community, in order that its cultural life may be broadened and deepened by opportunities for hearing the world's great music.

PAUL O. SELBY, B. S., A. M.
Professor of Commerce and Head of the Division of Commerce

Division of Commerce

THE COMMERCE DIVISION offers its courses for the purpose of preparing teachers of commercial subjects for the high schools of Missouri. These courses were established in 1908, and our school was a pioneer in offering preparation for this type of teaching.

The Teachers Colleges of Missouri are the only institutions in the state which offer work in this field, and this is probably the only phase of the work of this college of which this statement may be made. As a consequence, students in Commerce have in the past found that they are among a limited number of people who are qualified in this specialty.

The courses in Commerce are those that are required of commerce teachers. They cover the subject-matter fields of shorthand, typewriting, accounting, and business law. A course in "Commerce and Industry" which attempts to present a bird's-eye view of the world of business is given to senior college students. Demonstration and practice teaching is carried on in the Kirksville Junior and Senior High Schools. The cooperation of the school administrators and of Miss Frances Henderson, teacher at the Senior High School, is greatly appreciated.

LOUIS A. EUBANK, B. S., A. M., Ph. D.
Head of the Division of Education

Division of Education

It is generally agreed that the efficient teacher should have knowledge of four types:

1. A general understanding of the major fields of knowledge and their relation to the world about us.
2. A thorough knowledge of the subjects taught.
3. A knowledge of child life and child development.
4. A knowledge of how to bring subject matter and child together in the most economical manner for effective child development.

The Division of Education is interested in giving the prospective teacher the knowledge, skills, and attitudes in the two latter types.

Courses in psychology and education aim to give an understanding of child life with its varied interests, aptitudes, and abilities at the different age levels. Professional courses in general and special methods and student teaching plan to give the teacher knowledge and practice in teaching techniques.

Professional education has changed in recent years. The same scientific techniques in physical and biological sciences which have revolutionized the industrial world are now being applied to professional education. Research studies have added much knowledge in administration, supervision, curriculum building, techniques of teaching, measurement, et cetera. It is the duty of the teacher of professional education today to live in the frontiers of knowledge in his chosen field and to vitalize his teaching by interpreting to his classes the latest and best knowledge available from the educational laboratories.

The Division of Education is rendering many services outside the college classroom: principal of elementary and high school demonstration units, supervision, demonstration teaching and inspection in rural schools, extension teaching, high school visitation, director of libraries, service on faculty committees, lectures on professional subjects in schools of Northeast Missouri, and lectures before civic and religious organizations in the community. Several members of the Division of Education teach in the academic departments. In return members of academic departments teach special methods courses in education and supervise in demonstration schools. This plan of cooperation between the academic and professional departments is imperative if a teachers college is to fulfill its function.

and Head of the Division of Public Health
and Physical Education

Division of Health and Physical Education

HEALTH is the only human quality which may be transmitted from one generation to the next. It is the only attribute of a life upon which the surety of success may be built. Thus that nation is strongest which is healthiest, and the excellence of an individual is strengthened by virtuous living. With the rhythmical development of life the extraordinary possibilities blossom out in supreme happiness—the ultimate goal of human life.

THE WOMEN'S ATHLETIC ASSOCIATION was organized in the fall of 1924. The purpose of this association is to further women's athletics and to develop a spirit of sportsmanship.

The Association offers two awards: first, a letter "K" given to any girl earning five hundred points; second, a monogram sweater for a thousand points. These awards are presented in the spring at the W. A. A. banquet.

The W. A. A. sponsored several successful tournaments the past year: namely, volley-ball, basketball, track, tennis, and baseball.

New members are taken in at the beginning of each quarter, and we take this opportunity to welcome any college woman to become a member.

Dancing Club

WHY DANCE?

*For molding characters of worth
We dance.*

*To realize our aims on earth
We dance.*

*To thrust conventions that confine
Our spirits in too straight laced line,
To bring much nearer the divine
We dance.*

THE DANCING CLUB was organized in 1931 and is sponsored by the W. A. A. Clogging and tap dancing are the main interests. This organization has proved valuable in supplying numbers for programs as well as promoting an interest in dancing. All girls belonging to W. A. A. receive points toward their letter or sweater by perfect attendance at the club and by taking part in a program, either in a group dance or a solo dance.

THE girls' pep organization, the Howlers, was organized in the fall of 1928 primarily to promote pep at our games at home and to accompany the team on its trips. In addition to their participation at all athletic contests, they have taken an active interest in all campus affairs. Their attractive new black and white uniforms add much to the pep of the organization.

LLORA B. MAGEE

Ph. B., University of Chicago; A. M., Columbia University

Professor of Household Arts and Head of Division of Home Economics

Division of Home Economics

THE work offered in the Division of Home Economics is organized to meet the needs of three groups of students: (1) Those who plan to teach home economics in elementary and secondary schools; (2) those who plan to enter a vocation other than teaching and requiring training in Home Economics; and (3) those who desire some education in problems related to the home.

Courses are organized in the field of textiles and clothing, foods and nutrition, child development and home management. Courses are offered in methods of teaching home economics also. A special course in dietetics is offered for nurses in training in the Grim-Smith Hospital. In addition to the work in home economics, the major must have work in physical and biological sciences, art, health, sociology, and economics.

An attempt is made in each course not only to acquaint the student with the subject matter in that field but to point out new developments and to arouse her interest in unsolved problems. The teacher of home economics must be a student of both subject matter and methods.

If the student desires to enter some other vocation than teaching, she may elect additional courses that will help her. An effort is made in all courses to assign special problems to meet individual needs.

While many of the courses are planned for majors, and the prerequisites are such that others may not be admitted, there are courses in every field of subject matter open to all students.

JACOB W. HEYD, A. B., Ph. M.
Head of the Division of Language and Literature

Division of Language and Literature

LANGUAGE is the most precious heritage of the human family. It has made possible all advancement which mankind has attained. The study of its evolutionary growth reveals the gradual unfolding of man's ever expanding mental, moral, and spiritual grasp as he with ever accelerating conquest subdues the hidden and often hostile forces of nature and makes them his docile servants. Language has a living, growing existence ever pulsating with the life of the people using it. The content and quality of its literature in all the realms of human endeavor form indices of the civilization of the peoples whose vehicle of expression it was or is.

Thus, the study of language and literature opens the avenues of penetration into all fields which challenge the active inquiring mind. Everyone who makes pretense of scholarship must needs be conversant with one or more languages besides his vernacular. Without this he is greatly handicapped. Three languages today stand preeminent the world over—English, French, and German. With these three, or at least two of them, one is at home among the educated of every land and nation. The knowledge of these can make one a world citizen.

The Division of Language and Literature offers all three and in addition Latin as a basis for acquiring vocabulary and an insight into an ancient civilization, the best of which has been appropriated and has become an inspiration to all modern peoples.

THE NORTHEAST MISSOURIAN, formerly the *Index*, has just closed its twenty-third year as the college newspaper. The name, *Northeast Missourian*, was officially adopted in July, 1931, by an unanimous vote of the Student Council, as distinctly representative of the college and the Northeast Missouri District.

The paper is published primarily for the students, alumni, and patrons of the college. Its platform is "to give views clearly and impartially; to consider all sides of the issue; to give the news."

The material is written by members of the newswriting classes of the college.

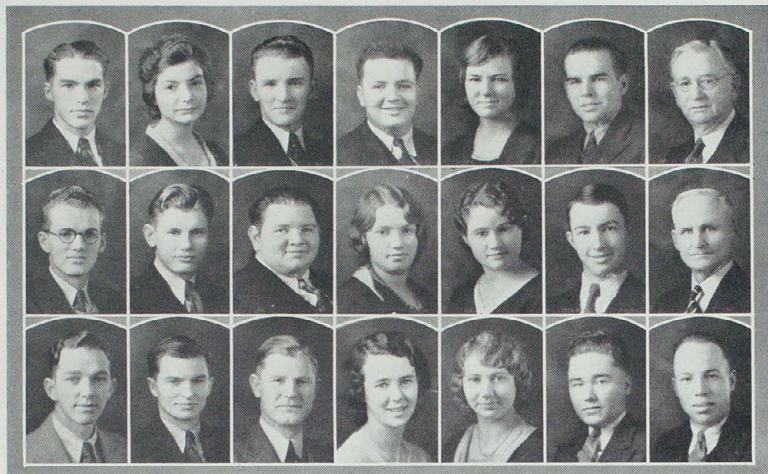

GEORGE HAROLD JAMISON, B. S., A. M.
Professor of Mathematics and Head of the Division of Mathematics

Division of Mathematics

MATHEMATICS is not a new subject. It made its appearance in that far away dawn of history along with the development of language. In fact mathematics is the language used in expressing quantitative relations. Since human life can not get away from quantitative relations, it can not avoid mathematics. When one studies quantities and space relations apart from objects, mathematics becomes abstract. In all civilization a certain group of people have devoted themselves to the development of this science, just as others have made contributions to music, art, and science. The mathematics of any time has usually gone a little ahead of its civilization, making ready for further advances. The average individual little thinks of the higher mathematics necessary for such an achievement as the famous Lindbergh flight to Paris, or the mathematics necessary for an Edison or a Marconi to carry on his experiments.

Mathematics is not a popular subject. It lends itself in the grades and high school to mechanical treatment, and the teacher, seeking to teach the easy way, drifts into this method of work. The result is that young people, usually anxious to know the meanings of things, become discouraged when new situations require thought and not mere rules. This department seeks to give teachers meaningful mathematics, so that teachers may give to young minds an understanding of the operations and processes of mathematics. This means making teaching a hard job. It means also that young people will see and share in the development of one of the great tool subjects and culture subjects of civilization.

SIGMA ZETA, a national honorary science and mathematics fraternity, was founded in 1925 at Shurtleess College, Alton, Illinois. The Delta Chapter was installed in this college May 9, 1927. The purpose of the fraternity is to increase an interest in, and a knowledge of science and mathematics, and to encourage a higher degree of scholarship.

WILLIS J. BRAY, B.Pd., A.B., B.S., A.M., Ph.D.
Professor of Chemistry and Head of the Division of Science

Division of Science

THE SCIENCE DIVISION of this college is composed of the departments of Agriculture, Biology, Chemistry, Physics, and Physiography and Geology. Students are given opportunity to major in any of these fields except Physiography and Geology. The curricula are so planned that a student can qualify to meet the teaching combinations most frequently demanded.

Classes in Agriculture have as laboratory facilities the two college farms, including projects in dairying, horticulture, poultry culture, soil improvement, animal breeding and nutrition, and farm crops. This department has practically perfect articulation with the School of Agriculture of the University of Missouri, so that those who have majored in Agriculture here may continue their work there without loss of time or credit.

The facilities in Biology in this college are such that a student desiring to major in this field may do so satisfactorily. The chemistry and physics laboratories are very well equipped. Those who plan to major in either of these fields need have no difficulty in continuing their studies in graduate school in any of the leading universities. Facilities are offered for a minor in physiography and geology for those who are interested in that field.

The curricula are so planned that students who come to this college at the beginning of their college career need have no difficulty in meeting the most rigid demands of the teaching field or of pre-professional requirements. This division has the most modern equipment for visual instruction. This equipment includes the newest portable motion picture projector, Leica camera with equipment for microphotograph work, 16 m.m. motion picture projector, 35 m.m. film slide projector, 16 m.m. film slide projector, and stereopticons for glass slides.

The seven members of our divisional staff are well prepared, both in academic and professional studies and in teaching experience. All are prepared to bring to the student a breadth of training and experience not found in many colleges.

C. H. McClure, B. S., A. M., Ph. D.
Professor of Political Science and Head of the Division of Social Science

Division of Social Science

THE DIVISION OF SOCIAL SCIENCE includes history, political science, economics, sociology and geography. There is a very close relationship between all these fields, and the organization of the work of the division recognizes this fact. Geography, which is sometimes not called a social science, is probably more closely related to history than some courses in history are related to each other. For example, a good understanding of American History is probably more dependent upon a good understanding of the geography of North America than upon a good understanding of European History, certainly more than upon an understanding of ancient history. It requires no illustrations to show the close relationship of the other social sciences to each other. The organization of the work of the division emphasizes this fact.

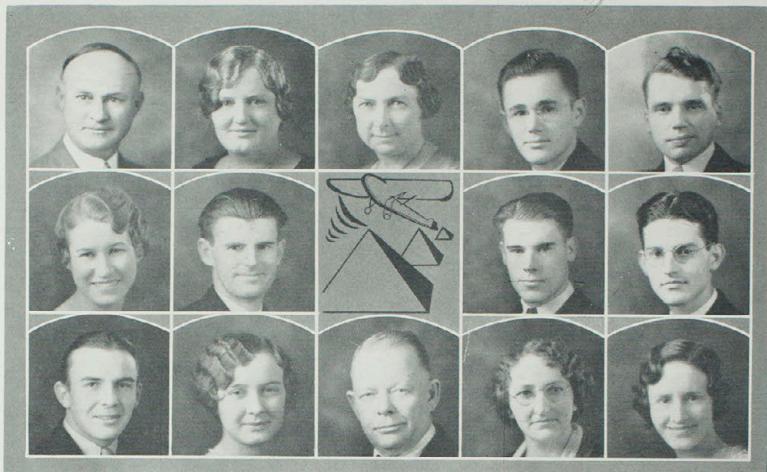

The fact that the division of social science is a part of a teachers college is never forgotten. The teachers of the division recognize the fact that they are teaching social science to college students who are to be teachers and who will need to use the information they are now getting as a basis for teaching the social science program in schools of the state. This fact is emphasized by the course in the teaching of the social sciences in the high school and by syllabi for teaching courses in high school that are worked out in connection with parallel college courses.

The division has a dark room, 207 Library Building, equipped with lanterns and one of the latest reflectoscopes for throwing pictures and maps and other material from books and papers upon a screen. Another aid to instruction is a large amount of museum material. At present there is not adequate room for the display of this material, but it is hoped that some time in the near future the college will be given a building to replace the one destroyed by fire several years ago. When that time comes, much more of the museum material can be made available for instructional purposes.

The division also sponsors "The Historical Society," the oldest student organization on the campus. This year has been one of the most successful years for the Historical Society.

The work of the division is carried on by a corps of six instructors. The regular teachers are: Dr. C. H. McClure, Mrs. Catheryn Seckler Hudson, Miss Lucy Simmons, Dr. G. V. Burroughs, Mrs. Clara Howard Clevenger, and Dr. W. H. Ryle.

This year Mrs. Hudson and Mrs. Clevenger are away on leaves of absence studying for the doctors degree, and their positions are filled by Mr. Don Hudson and Mr. Bailey Wright.

THIS organization was formed in 1905 by the following men: Dr. Eugene Fair, Professor J. T. Vaughn, Representative E. O. Jones, Superintendent Chas. Banks, and J. H. McKinney. Every two weeks meetings were held at ten o'clock on Saturday. The meetings were two hours in length. The programs, consisting of a worthwhile discussion by one of the members, were planned many months in advance. Each member of the Society was expected to contribute some thought to the subject in the round table discussion. With the exception of a very few years, the Society has been active, and now as then has maintained a high standard in its programs.

Review of Football Season

THE 1931 football season started with the opening of school, and eighty college men, the largest squad in K. S. T. C.'s history, ran out on the practice field to bid for varsity positions. Among this unusual array of material were fourteen dependable letter men ready to defend their places against forty-one freshmen aggressors.

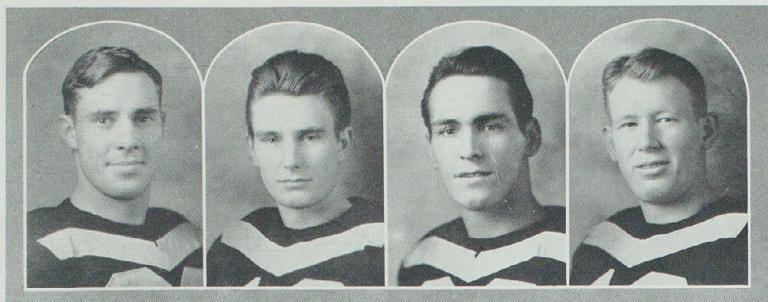

Under the able direction of Coaches Faurot and Protiva the Bulldogs made a remarkable and outstanding record. They plowed through a most difficult schedule, suffering from but one defeat in eight games, and piling up a total of one hundred forty points to their opponents' thirty-two. Sixty of these points were scored in conference games, with

H. HUDSON

A. VIETH

C. MURPHY

R. ELLIOTT

K. BACON

J. BURROUGHS

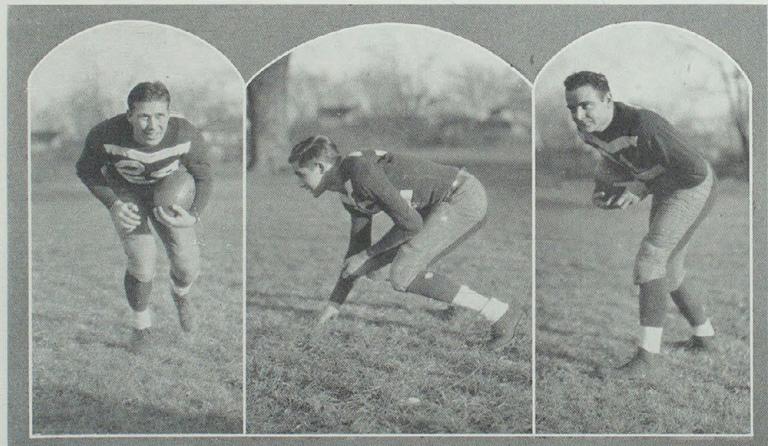

N. BEARCE

twenty points scored by the M. I. A. A. opponents. House and Hatcher were the leading scorers of the season.

The Bulldogs outgained every team they played against, even the three hardest teams of the season, which were with Springfield, Emporia, and Maryville. They not only made more first downs, but they also gained more yards from scrimmage.

Kirksville placed six men on the mythical All-Conference team, and two on the All Missouri team, picked by the Kansas City *Journal-Post*.

The season opened September 25, when the Bulldogs played the Chillicothe Business College under the lights of Stokes Stadium. Coach Faurot played forty-four men, thirty-three of them being new players with K. S. T. C. The Ducks' strong point was forward

R. HOUSE

R. DOYLE

J. DOUGHERTY

J. ROBINSON

M. ROHDE

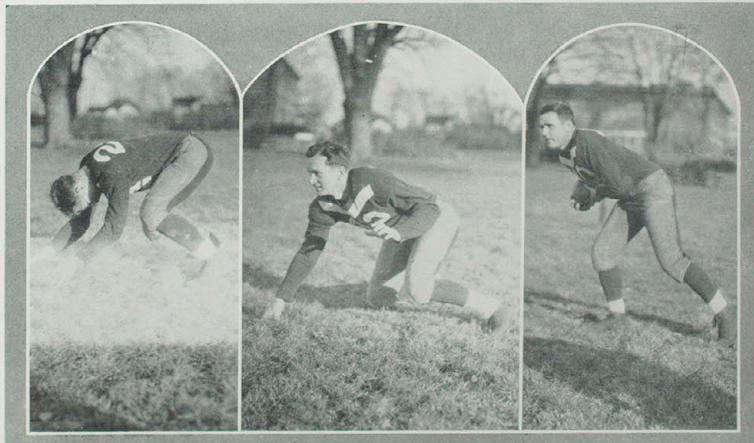

H. MORRIS

R. GOSLIN

passes, but they did not get within scoring territory; while House and Hatcher were constantly crossing the Ducks' goal, and with Dougherty's kicking toe the final score was run up to thirty-two to nothing in Kirksville's favor.

The Bulldogs played their first conference game at home on October 2 with Cape Girardeau. The first quarter of the game forecast a victory for Cape, the score favoring the Southeasters six to nothing, but this impression was changed when Kirksville launched a series of plays which ended the game with K. S. T. C. having forty-one points and Cape six points.

October 9 brought another victory to Kirksville when the Bulldogs played Central College at Fayette. Central was in Bulldog territory but once during the entire game.

W. STEENBOCH

G. WILSON

L. WADE

D. MOODY

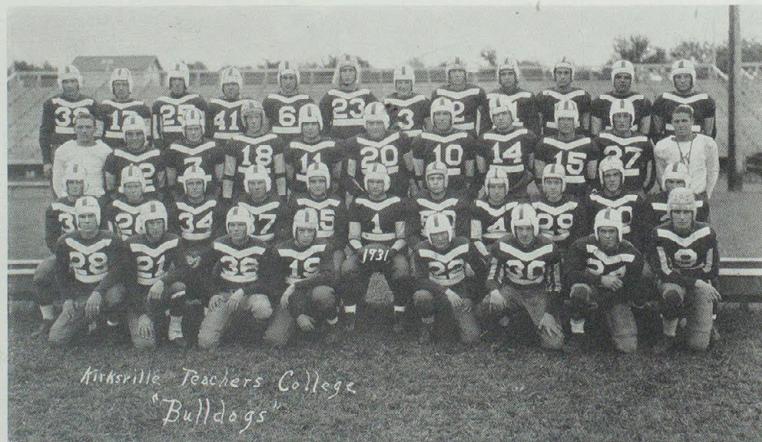

E. HATCHER

F. KURELAITIS

A. EMBREE

Hatcher and Wade twice carried the ball over their opponents' goal; Hatcher place kicked for the extra points, and the game ended fourteen to nothing.

On October 16 the Bulldogs played the Warrensburg Mules, another conference game on Stokes Stadium. The superpower of the Bulldogs, which had been so obvious in the past games, was greatly reduced by men on the injured list, and fear swept K. S. T. C. constantly until the third touchdown in the last quarter. Embree's sixty-five yard run for a touchdown was the outstanding play of the game. House plunged the line for a touchdown, and Hatcher kicked goal making the score at the end of the half thirteen to nothing. The Mules staged a comeback after the half which resulted in a touchdown, and it was not until House crashed through the line for another touchdown that the game was won, the final score favoring K. S. T. C. nineteen to seven.

The Emporia game, said to be the most thrilling ever played on Stokes Stadium, was played October 23. Wade scored early in the game for Kirksville with a fifteen yard sprint around Emporia's left end, but the try for point was missed. Emporia opened up in the last quarter with a long run by McCoy to tie the score. Then a pass to Captain Rich over the goal line put Emporia ahead of Kirksville, twelve to six. With only four minutes left to play, Bacon, half back from St. Charles, on a triple pass play, sprinted sixty-five yards for a touchdown to tie the score at twelve all. Hatcher, star quarter back on the Bulldog eleven, added the extra point, winning the game thirteen to twelve.

October 30 took the Bulldogs to the Ozarks. Here the Springfield Bears tied Kirksville for the third time in four years. Most of this game, except for the second quarter, was a tossup, with perhaps the Bulldogs showing a slight advantage. In the second quarter the Bulldogs pushed to the Bears' four yard line, but were unable to penetrate the wall-like line of the Ozarks. Also this quarter Hatcher completed a thirty-five yard pass to Doyle, left end, for a touchdown, which because of a penalty did not count. The Bulldogs made fifteen first downs to five for Springfield, but lacked the necessary punch to put over a score.

On Armistice Day K. S. T. C. played the strong Bearcat team at Maryville and lost their first conference game in five years. A sea of mud retarded the strength of both teams, but gave the heavy Maryville team a little advantage, as a driving downpour of rain began the previous day and continued throughout the game. The Bulldogs played in Maryville territory the first three quarters, and out-played them in every phase of the game, only to weaken in the last two minutes and to be beaten by a score of seven to nothing. Thus, K. S. T. C. was edged out of the fifth consecutive M. I. A. A. conference championship.

The Bulldogs closed the season on November 19 by crushing the Missouri "B" team by a score of twenty-one to nothing. Coach Faurot used more than three teams in this easy victory, and many K. S. T. C. supporters expressed the opinion that the Bulldogs' had the ability to defeat the Missouri varsity eleven. Thus, ended one of the most successful football seasons in the history of the school, with respect to games won and lost, since K. S. T. C. lost only one game.

1931 Football Season Record

Kirksville	32	Chillicothe	0

Campus Leaders

IN making the selection of campus leaders, we did not consider leadership in any *one* phase of school life but all-round development and leadership in many phases.

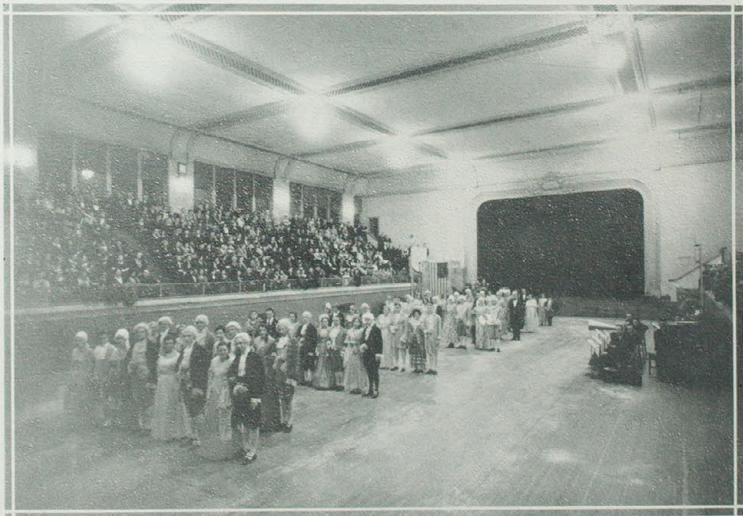

We used the following rating scale in coming to our decision:

1. Scholarship	20 points
2. Participation in all school activities	5 points
3. Participation in extra-curricular activities	10 points
4. Leadership in student organizations	15 points
5. Culture and refinement	15 points
6. Moral responsibility	15 points
7. Promise of success	20 points

Review of Basketball Season

THE 1931 basketball season started with a squad of twenty-seven men reporting for daily practice. Of these there were only five letter men from previous years.

In the first game the Bulldogs fought hard and finally won from the strong Culver-Stockton veterans by a score of 28 to 22. The next night they disposed of Westminster's seven letter men by a score of 39 to 25.

In the Moberly Junior College game the Bulldog quintet showed their ability in shooting baskets. They played all over the court and trounced the Moberly boys 56 to 21.

After a good rest over the Christmas holidays the Cape Girardeau Indians came here to avenge the beating of last year. Both teams played hard and showed an excellent brand of basketball. Several times during the last part of the game the score was tied. In the minute played an Indian shot a field goal winning from Kirksville by a score of 33 to 32.

On January 11 the Bulldogs went to Westminster and played a game that was tied until the last thirty seconds to play. Then the Bluejays emerged one point ahead as the gun sounded a defeat to K. S. T. C. of 23 to 22.

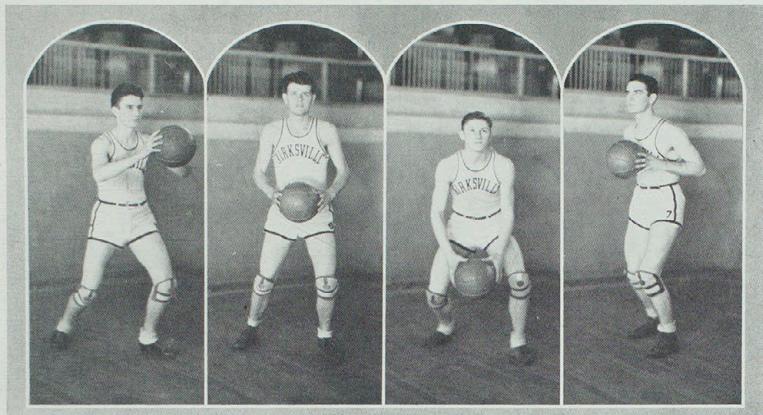

The next game was played in Kirk Auditorium with the Central Eagles. They proved to be a classy five by whipping the Kirksville Bulldogs to the tune of 32 to 24.

On January 14 the Kirksville team went to Canton to play Culver-Stockton, determined to overcome their "slump." The final score was 36 to 30 in the Bulldog's favor.

The next night Kirksville walloped Chillicothe 50 to 21 in the Kirk Auditorium.

K. S. T. C. upset the conference dope on the twenty-second when they defeated the Mules at Warrensburg 26 to 23.

The Maryville Bearcats gave the Kirksville Bulldogs their worst defeat of the season when they defeated them 32 to 18 in the next game.

K. BACON

B. GARWOOD

O. TOWERS

C. PETTIGREW

The next game took the Bulldog five to St. Louis. Here they defeated the Concordia preachers by a score of 26 to 22 in a difficult game.

On February 4 the Springfield Bears defeated the Kirksville Bulldogs 31 to 20.

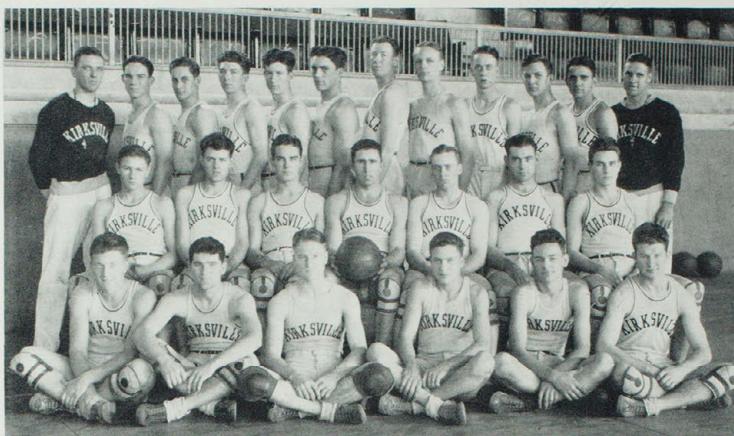

The next two games took the Bulldogs on a five day road trip to play the Springfield Bears and the Cape Girardeau Indians. In the game at Springfield the Bulldogs kept in the lead and played in exceptionally good style during the first half, but in the second half their defense weakened and the Bears ran the final score up to 22 to 13, favoring Springfield. In the game with Cape K. S. T. C. took the lead from the start and even though the Indians constantly threatened it, the Bulldogs surged on through with a 25 to 23 victory.

The Kirksville quintet played their last home game on February 19 with Warrensburg. The Mules came to Kirksville to avenge the defeat that the Bulldogs gave them earlier in the season. The score was tied at the end of the first half 16 to 16. The Bulldogs started the second half with renewed strength, keeping a lead until the timer's gun boomed a victory for K. S. T. C. of 35 to 27.

The last conference game of the season was on the twenty-sixth at Maryville. Maryville won with a score of 30 to 11.

On the following day the 1931-32 season closed with a game at the Chillicothe Business College. The Bulldogs played an easy game, winning by a score of 65 to 23.

From the standpoint of games won and lost, the 1931-32 basketball season was most successful. Out of seventeen games played the Bulldogs won ten and scored a total of 526 points to a total of 440 points scored by their opponents. Carl Pettigrew, Bulldog center, was the leading scorer of the team. The Athletic Committee awarded letters to the eight men as follows: Captain Barton, Carl Pettigrew, Captain-elect Curtright, Eugene Wallenbrock, Orval Towers, Kenneth Bacon, Bert Garwood, and Harold Morris.

1931-32 Basketball Season Record

Kirksville	28	Culver-Stockton	22
Kirksville	39	Westminster	25

The man whose eye
Is ever on himself doth look on one,
The least of Nature's works, one who might move
The wise man to that scorn which wisdom holds
Unlawful, ever. O be wiser, Thou!
Instructed that true knowledge leads to love;
True dignity abides with him alone
Who, in the silent hour of inward thought,
Can still suspect, and still revere himself,
In lowness of heart.

Review of the Track Season

THE track season of 1931 started off with only a few letter men on the squad, but the new material looked rather good and several of the old men, including Captain Keethler, were expected to enter school within a week or two. Coach Simpson had eight meets scheduled and tryouts were to be held on March 15 and 16.

The team began to show more ability as last year's letter men came on the track, and the prospects for winning the Missouri University Invitation Meet on March 21 looked favorable. The meet day came, and the results were that K. S. T. C. was outclassed only by Missouri University and Washington University.

The Bulldogs went to Columbia on March 27 to compete in the M. I. A. A. Indoor Meet. They were forecast as being winners, but were nosed out by Springfield by a score of 45 to 38, with Warrensburg following with 19, Cape Girardeau 17, and Maryville 7.

April 11 took the K. S. T. C. Tracksters to a triangular meet with the University of Missouri and Westminster College at Columbia. This was the first outdoor meet of the season, and the men demonstrated their superior condition by being only surpassed by the University of Missouri. The outstanding event of the contests was "Pat" Beall's beating Captain Schwary, former big six conference champion.

The Kirksville Bulldogs had an easy victory when they met the Central College track team on Stokes Stadium April 17. K. S. T. C. ran up $84\frac{1}{2}$ points to Central's $50\frac{1}{2}$, capturing eleven out of sixteen firsts and several seconds. Captain Ray Keethler was high point man with two firsts, one second, and one third. The relay points were divided. Central won the half mile relay, and Kirksville won the mile relay. The time for the races was slow as the track was soft, and this also slowed down some of the field events.

At Chillicothe on April 22, the Bulldogs won from the Business College Ducks by a score of 63 to 54. Captain Keethler of K. S. T. C. was high point man with 20 points, and Barton was second with 13 points. Keethler also set a new record for the 220-yard low hurdles of 25.4 seconds, one second less than the old record.

The Culver-Stockton Meet of the twenty-fifth nearly turned out to be a swimming meet. It was held on Stokes Stadium in a drenching rain. Keethler again took high point honors with Bettis of Culver-Stockton following only two points behind. No records were broken, and time was slow because of the rain.

K. S. T. C. lost its first dual meet of the season at Maryville by 73 to 63 points on May Day. Kirksville took most firsts, and Captain Keethler was high point man. Maryville succeeded in getting both first and second in the 100- and 220-yard sprints, and in the pole vault. Coach Simpson says that this weakness was the cause of their defeat.

May 8 brought a closely contested meet to Stokes Stadium when the Westminster Blue Jays met the Kirksville Bulldogs. The Bulldogs were handicapped by an injury to Captain Keethler who sprained his ankle while broad jumping. In spite of this injury he went on to win high point honors with $17\frac{1}{4}$ points, winning first in the broad jump and a tie for first in the high jump. Another outstanding event of the meet was "Pat" Beall's chalking up a new school record of 4:32.6 for the mile run, 1 and 1-10 below the M. I. A. A. record made in 1928. In the last part of the meet Kirksville stepped out in the record time of 3:33.4 for the mile relay, annexing 5 points to the score and winning by $70\frac{1}{2}$ to $65\frac{1}{2}$. This dual meet was the most exciting of the season, regardless of the fact that it was a non-conference meet.

The "tell-tale" of the season was the M. I. A. A. Outdoor Meet held at Cape Girardeau on May 15. Kirksville proved its athletic ability by taking more firsts than any other college and by tying with Springfield for first in the total points. Out of the sixteen different events the Bulldogs captured six firsts, five seconds, no thirds, and three fourths. Beall won the mile and two mile runs; Barrickman won the 440 yard dash; Goldsby won the discus; Barton won the shot put; Hayden won the 880 yard run. The total points scored were as follows: Kirksville 48, Springfield 48, Maryville $39\frac{3}{4}$, Warrensburg $23\frac{3}{4}$, and Cape Girardeau $16\frac{1}{2}$.

School at K. S. T. C. was out by May 23, but the Bulldog Tracksters couldn't stop running so they went to the Missouri-Kansas Interstate Meet, one of the fastest meets in the middle-west, and won outstanding honors. The Pittsburg, Kansas, Teachers won the meet; Wichita College second; and Westminster and Kirksville tied for third with 27 points each. Beall won the two mile run and placed second in the mile. Barton placed second in the shot put and third in the discus. Goldsby placed second in the discus, and Captain Keethler placed third in the broad jump. Thus ended a most successful track season.

COACH DON FAUROT

Review of Baseball Season

BASEBALL in K. S. T. C. is a new inter-collegiate sport which is fast becoming popular in the mid-western colleges. It has just recently become a major sport with the Bulldogs and is financially self-supporting.

Thirty-five men answered Coach Don Faurot's call for a 1931 baseball team. Prospects for an outstanding nine were excellent. Besides the abundant new material there were six last year's letter men. These veterans were McArtor, catcher; Houser, pitcher; Protiva, third baseman; Bolin, short stop; Bigsby, first baseman; and Pettigrew, outfielder.

Practice got under way with a bang; men worked out in the gym in bad weather, whipping themselves into shape so as to take greatest advantage of a clear sky. After several weeks of practice the Bulldogs were ready to meet the difficult schedule Coach Faurot had contracted for them, including Washington and Missouri Universities.

On April 9 K. S. T. C. opened its baseball season by going to Columbia to meet the Missouri University on its diamond. The game was destined to be close with Wagner pitching for the University of Missouri and Houser for Kirksville. During this game Houser hurled no less than fifteen strikeouts and granted but one base on balls and six hits. Not a University player reached first base until the fifth inning, then a score was made. K. S. T. C. scored in the third and the sixth innings. Then the University players hit a home run in the seventh, scored in the ninth, taking every advantage, and winning the game 3 to 2.

The Bulldog diamond artists went to St. Louis to play Concordia on the thirteenth. In this game, Sieber, pitcher for the Seminary team, was the star. He held Kirksville to six hits while he scored three runs. It was not until the seventh frame that any Bulldog was able to hit a fly ball into outfield. He fanned eleven K. S. T. C. batters. Kirksville scored in the third inning, and the opponents scored from Langkopf, Bulldog hurler, once in the second inning, twice in the sixth, and once in the eighth, making the final score favoring St. Louis 4 to 1. The Bulldogs were scheduled to play Washington University on the twentieth, but the game was called on account of rain.

Next the Kirksville players went to Fulton to play the Westminster Bluejays on April 23. The battery for the game was Houser, pitcher, and McArtor, catcher. Houser pitched a good game despite an injured back, striking out seven men and shutting out the Bluejays by a score of 2 to 0.

On the twenty-seventh the Bulldogs added another victory, by beating Maryville 8 to 1 on the Kirk Field. The battery was Langkopf and Houser. Langkopf struck out five men and walked two. McArtor, catcher for K. S. T. C., knocked a homer driving in one run on base. Langkopf, Protiva, and McArtor gained two base hits off of the Maryville pitcher. The Bears won their lone point in the ninth inning.

The Kirksville team, desiring to prove that their victory of the twenty-seventh over Maryville was not an accident, went there May 4 to accept another challenge. They wallowed the Maryville players 7 to 1. Houser was king of the diamond for the Bulldogs, allowing only five hits, one of them being a home run which made Maryville's only score. Houser knocked a homer and a single and touched the home plate for three of the seven runs. But the next day's game was taken by the Northwest Missourians by a 2 to 1 count. In this game the Maryville pitcher allowed the Bulldogs only two hits and both of these were to Catcher McArtor.

The Missouri University Baseball Team came to Kirksville on April 7 to defeat the Bulldogs again, which they had done on their own field in the first of the season. But since then the teachers had added some new men and had had some valuable experiences. However, the University of Missouri was leading the big six conference, and the game was forecast to be a tough one. Houser and McArtor formed the battery, and with every Bulldog functioning perfectly the University players were trounced by a 16 to 0 score. This game fully displayed the Bulldogs' strength and ability.

The wind-up of the baseball season was made on April 13 and 14 when the Washington University of St. Louis came for a two-day schedule of games. Jordan and Houser were the competing pitchers of the first game. The St. Louisians scored twice in the third inning, once in the fifth, and once in the eighth. Kirksville scored twice in the fourth and twice in the ninth, which tied the score 4 to 4. They played on and on, far into the evening. Not until after sixteen innings did they call it on account of darkness. These two pitchers certainly went through a grilling, and both displayed big league stamina. Houser struck out twenty-two men and Jordan struck out nine.

The next day's game with Washington University brought Langkopf to the mound for Kirksville and Newman for Washington University. All of the baseball fans of Kirksville turned their eyes to this game because of the previous day's record. Very few people had witnessed a game so closely contested and carried on so many innings. This game, however, was not so exciting. The Bulldogs proved that they were the superior team by winning this game 7 to 4. Langkopf demonstrated his pitching ability by striking out ten batters. The Bulldog Baseball Team of this season was recognized as the best in K. S. T. C. history and was distinguished as being the conference champion.

1931 Baseball Season Record

SIGMA TAU GAMMA was founded at the Central Missouri State Teachers College at Warrensburg, Missouri, in 1920. Beta chapter was established at the Northeast Missouri State Teachers College at Kirksville, Missouri, in July, 1921. The chapter had existed as Phi Lambda Epsilon since 1895. Sigma Tau Gamma is the oldest national teachers college fraternity and is also the largest, having sixteen chapters, all in four-year teachers colleges.

THE BLUE KEY FRATERNITY, known as the "College Man's Rotary Club," bears the same relation to the college that the Rotary Club bears to the community at large. Blue Key was founded at the University of Florida in the fall of 1924. The decision to expand into a national fraternity was made in February, 1925, and now there are chapters in sixty colleges and universities throughout the United States. The chapter at the Northeast Missouri State Teachers College was organized December 9, 1925, and installed April 5, 1926.

Membership is based on the following qualifications: (1) Scholarship; (2) Interest and affiliation with school activities; (3) Personality, and (4) Moral standing. It is limited to twenty members, having thirty hours of credit in this institution.
